Experience & Projects

Promote The Vote:
This application was created to provide a platform for US citizens to communicate with others about why they vote and how they better prepare themselves.
-MERN Stack
-Uses Cheerio to Scrape Data

Buy Ally:
Buy Ally allows users to post Reviews/Picture/Video and URL about the purchases they have made and the items they want to share. User can use Category Filter to see slides of a particular category, Post are allowed only if use has an account with us. That provides an extra layer of security.
-Uses Node and Express
- MySQL Database

Parks N Stops:
One stop shopping for individuals looking for hiking and national parks. We focused on: The user's ability to search along the route for desired stops. Providing them with different locations of one point of interest.
-Google Mapping API

Academic Background

Rutgers University
Coding Bootcamp, 2019
-Full Stack Front and Backend Development

King's College
Bachelor of Arts in History and Education, 2010
-GPA:3.37
-Graduated with honorable Mention
-President: Phi Alpha Theta, History Honor Society

Reference Statement
"Kristen is a strong public speaker and is hands down one of the most creative people I know. This rare mix of productivity and ambition sets a great example for the rest of the team, and explains why everyone loves working with Kristen!"
